

Outcomes and experiences S3 Physics	G	O	R	How do I know I can do this or what can you do to improve your learning in this outcome?
I can define acceleration as being the change in speed (velocity) per unit time				
I can identify the quantities, and units, represented by the symbols in the formula $a = \frac{\Delta v}{t}$ $a = \frac{v - u}{t}$				
I can carry out calculations using the formula $a = \frac{\Delta v}{t}$ $a = \frac{v - u}{t}$				
I can carry out acceleration calculations using data from a v-t graph				
I can describe an experiment to determine the acceleration of an object
