

Outcomes and experiences S3 Physics	G	O	R	How do I know I can do this or what can you do to improve your learning in this outcome?
I can identify situations where the forces acting on an object are unbalanced				
I can identify the quantities, and units, represented by the symbols in Newton's Second Law <i>$F = ma$</i>				
I can use Newton's Second Law to explain the motion of an object				
I can carry out calculations using Newton's Second Law <i>$F = ma$</i> In situations where, <ul style="list-style-type: none"> • Only one force is acting • Two (or more) forces are acting in opposite directions
