

Outcomes and experiences S3 Physics	G	O	R	How do I know I can do this or what can you do to improve your learning in this outcome?
I can identify situations where pairs of forces act on an object				
I can identify the action and the reaction force in a variety of situations				
I can make a statement of Newton's Third Law of motion e.g. <i>"For every action force there is an equal and opposite reaction force."</i>				
I can use Newton's Third Law to make statements about action and reaction pairs				
I can define rocket launch as being, <i>"When the action force is rocket on gases, the reaction force is gases on rocket."</i>
