

Outcomes and experiences S3/S4 Physics	G	O	R	How do I know I can do this or what can you do to improve your learning in this outcome?
I can define pressure as the force per unit area				
I can explain situations using the definition of pressure e.g. crawling across ice is safer than walking across ice				
I can identify the quantities, and units, represented by the symbols in the formula $p = \frac{F}{A}$				
I can carry out calculations using the formula $p = \frac{F}{A}$				
I can describe the kinetic model of an ideal gas				
I can use the kinetic model to describe the pressure of a gas
