

S2 CfE Science Assignment PUPIL SHEETS

Being a Physicist

In this assignment you are to research and present evidence concerning an application of science to a problem within society. For example you could do this by investigating the methods by which damage from UV exposure is limited by applications of science or another other application of part of the EM Spectrum.

The assignment should include the following headings as well as at least one relevant diagram, table and/or graph. All sources of information must be stated.

- Title** - the name of the investigation
- Aim** - what you are trying to find out?
- Application** - what safety method are you researching?
- Underlying Science** - how does the method work?

1st Source

- What is the source
- What information did you get from it

2nd Source

- What is the source
- What information did you get from it

Conclusion

- What did you find out, was the aim of the investigation fulfilled?
- Impact of the application on society
