Outcomes and experiences S3 Physics	G	O	R	How do I know I can do this or what can you do to improve your learning in this outcome?
I can interpret the shape of a v-t graph to determine if an object is moving with • An acceleration • A deceleration • A constant velocity				
I can sketch a v-t graph to show an object with • An acceleration • A deceleration • A constant velocity				
I can carry out calculations to find distance using the area under a v-t graph
